SiteSeer3D for Chambers of Commerce (Associations)

1.0   Introduction

We have just launched SiteSeer3D for tourism, a new 3D virtual tourism system for the State of Idaho that will enhance tourism websites throughout the State with 3D mapping. This is a full, interactive 3D application so that visitors to your website can appreciate the beauty of your community and the location and amenities of your members as if they are flying around in a hot air balloon.

The heart of this system is on-line collaboration that generates content for the State's tourism portal, VisitIdaho.org as well as tourism related websites throughout the State. The State of Idaho has assembled vast amounts of information that is now available for your website to market your community:

- 30,000 points of interest
- 1,600 campgrounds and parks
- 17,000 miles of hiking and biking trails
- 6,000 miles of snowmobiling trails
- 400 boating sites and much more

In addition, content from your members will be available on your website. This can include:

- their location
- their logo
- the link to their website
- their amenities

SiteSeer3D is the first system to automate this exchange of information. Your members can publish content about their business to both your Chamber of Commerce website as well VisitIdaho.org. In fact, SiteSeer3D allows your membership to exchange content with any SiteSeer3D website they choose.

Visitors to your website will appreciate access to the State's recreational content, 3D address locator, 3D directions and live traffic and weather as well as property specific information about your membership.

2.0   Free Licenses

We are offering free SiteSeer3D licenses to non-profit associations such as Chambers of Commerce. This license will provide:

- the ability to highlight content about your membership on a 3D map of your area that includes the State recreation information
- free set up of your membership on your 3D map
- the ability to customize your map with local information

In order to register for a free license of SiteSeer3D, go to www.SiteSeer3D.com , identify yourself as an Association and follow the instructions to brand, build and publish your SiteSeer3D website to your existing website. We will contact you to set up your member information.

3.0   Revenue Sharing

SiteSeer3D will enhance your Chamber website and is a benefit to your membership. There is also an opportunity for you to use SiteSeer3D as an additional source of revenue.

Each of your members will appear on your SiteSeer3D website, however businesses will have the option of paying a fee to add additional content (their logo, link, drawings and labels). SiteSeer3D licenses enhance your members' websites with 3D and allow your members to publish their content on an unlimited number of other SiteSeer3D websites. The cost of this service is only $9.95 a month for 12 months or $99 pre-paid for a year.

Although we are willing to waive our $99 cost to set up your SiteSeer3D website with your branding and membership, we offer an alternative. If you would like to share in future revenues from SiteSeer3D, you can pay the $99 set up fee and we will send you 20% of the revenues from your membership each month.

If you have any questions, visit www.SiteSeer3D.com or feel free to contact GeoData Technologies at info@geodatatechnologies.com or call us at (208) 255-7215.

Regards,
Mark
